August 10, 1987

MEMORANDUM

SUBJECT: Fansteel Metals, Muskogee Oklahoma

FROM: *for* Guanita Reiter, Chief *Paul Sadowski*  
Oversight Section (6H-H0)

TO: Robert L. Deese, Acting Chief  
Superfund Site Assessment Section (6H-ES)

In reference to your August 4, 1987, memorandum regarding the RCRA regulatory status of this facility, our review indicates that this is not a RCRA-regulated facility at this time. Solid wastes generated at facilities during the processing of mining ores are currently exempt from RCRA regulation by Sec. 3001 (b)(2)(C)(ii) of RCRA.

Should your investigation indicate that these wastes are not the results of either extraction, beneficiation, or processing of ores and minerals, (wastes which are exempt from RCRA at this time) or if you should have questions on this matter, please contact Paul Sadowski of my staff at 5-6765.
